THE UNITED STATES NAVY

invites PUBLIC COMMENT ON THE PROPOSED REMEDIAL ACTION PLAN for

SITES 05 AND 08 AT NCBC DAVISVILLE, RI

The U.S. Navy will hold a Public Meeting to discuss the Remedial Investigation/Feasibility Study (RI/FS) and the Proposed Plan for Site 05-the Transformer Oil Disposal Area and Site 08 - the Defense Property Disposal office (DPDO) Film Processing Disposal Area, At Site 05, approximately 30 gallons of transformer oil containing polychlorinated biphenyls (PCBs) were reportedly disposed of on the ground in 1968 or 1969. At Site 08, for a six-month period during 1973, photographic waste liquids were disposed of onto the pavement outside of Building 314 and were allowed to drain onto the site. The Public Meeting will be held on Tuesday, August 16, 1994, at 7:00 p.m. at the Administrative Building (Building 404) located at NCBC Davisville.

Based on available site investigation information, limited action is proposed at both Sites 05 and 08, consisting of site use restriction. No remedial action or containment of the former disposal areas would occur. However, deed restrictions will be implemented to prevent future residential development of the sites. At Site 08, ground water use restrictions are also proposed. It has been determined that limited action would be protective of human health and the environment.

Although limited action is presently the preferred action, the Navy welcomes the public's comments on the proposed action. The Navy, in cooperation with EPA and Rhode island Department of Environmental Management, may modify the preferred alternative or select another option based on new information presented during the public comment period; therefore the public is encouraged to review and comment on the Proposed Plan until the close of the comment period.

The Proposed Plan, along with additional documentation is available for public review in the information Repository at the North Kingstown Free Library. Copies of the Proposed Plan are available at the library. Library hours are: Mon. through Thurs. 9 am-8:30 pm; Fri. and Sat. 9 am-5 pm.

The public may comment in person at the Public Meeting and/or may submit written comments from August 8 through September 6, 1994, to Mr. Robert Krivinskas, Northern Division, Naval Facilities Engineering Command at the address below. For more information on the sites, the comment period or the upcoming public meeting, please contact Mr. Leo Tomasetti, Public Affairs Officer at the Naval Caretaker Site Office, Davisville, Ri.
